**Technologies:** Unix/Linux, Git, MySQL, Spring Framework, Apache Spark, Hadoop, Selenium, Jenkins, HTML, CSS

## EXPERIENCE

---

### Amazon Web Services

East Palo Alto, CA

*Software Engineer Intern*

*Jun 2020 - present*

- Leading own internship project (ongoing) with minimal supervision and guidance
- Owning all stages of software development including requirement definition, functional design, architecture design, coding, unit testing, integration testing, deployment, and metrics collection
- Contributing to colleagues' work through design reviews and code reviews

### UiPath

Tokyo, Japan

*Technical Consultant*

*Oct 2018 - Aug 2019*

- Won company-wide "Best Project Award" for delivering successful 6 million USD project. Team size: 10
- Developed web application for system admins to monitor batch jobs
- Established coding convention, version control, CI/CD, improving developer productivity for a large software development project involving more than 100 developers
- Hosted weekly tech seminar to help more than 40 developers improve code quality
- Gathered customer feedback on UiPath's products coordinated product feature development, increasing customer satisfaction and making UiPath competitive

### Rakuten

Tokyo, Japan

*Software Engineer*

*Oct 2016 - Sep 2018*

- Developed web applications for clients to purchase and manage Ad campaigns
- Led effort to adopt Apache Spark to scale up data pipelines. Established best practice for Spark program design and performance tuning
- Coordinated development projects between business development teams and software product development teams to ensure that software products are developed to precise specification
- Mentored new graduates to help them become successful members of my organization
- Implemented Agile methodology for team of 10 developers and led weekly Scrum meetings

## PROJECTS

---

### Data API Granular Control (Amazon Web Services)

*Jun 2020 - present*

- Creating public APIs for AWS customers to configure their RDS database usage
- Delivering value to some of AWS's largest customers by bringing highly demanded features from conception to public access in a swift manner

### Data pipeline scale-up (Rakuten)

*Sep 2017 - Mar 2018*

- Led effort to scale-up Ad business's data pipeline using Apache Spark
- Created new data pipelines that can efficiently process billions of lines of log data per day
